

Telecommunications Subsidiary InfiniVAN's 10th Anniversary: Driving Digital Innovation with Japan-Quality Connectivity in the Philippines

We are pleased to announce that InfiniVAN, Inc. ("InfiniVAN"), our telecommunications subsidiary in the Philippines, celebrates its 10th anniversary on April 20, 2025. InfiniVAN will further contribute to the digital innovation of the Philippine social economy by providing high-quality telecommunications infrastructure of Japanese standards.

The Group's core Global Telecommunications Business began in 2012 by purchasing international telecommunications line capacity and selling it to cable TV operators offering internet services in the Philippines. In 2015, we established InfiniVAN and obtained a telecommunications license, allowing us to provide services in the Philippines using our own infrastructure. In 2020 and 2021, we acquired the right to use a portion of the international submarine cable City-to-city Cable System ("C2C Cable") connecting the Philippines to Hong Kong and Singapore, which will enable us to provide high capacity on international lines as well, and the Group became the third international data communication carrier in the Philippines, following two major telecommunications carriers.

With the completion of the Philippine Domestic Submarine Cable Network (PDSCN) in December 2023 and the establishment of a backbone network within the Philippines, it is now possible to fully deploy services throughout the Philippines, which were previously provided mainly in the Metro Manila area.

<InfiniVAN's 10-Year Milestones>

Year and month	Major Events
April 2015	InfiniVAN, Inc. established as a local corporation in the Philippines
June 2016	Legislation passed allowing InfiniVAN to conduct telecommunications business

We sincerely thank you for your continued support at our 10th anniversary party in the Philippines.

InfiniVAN's decade-long journey has been marked by key innovations and milestones that continue to shape the country's digital transformation:

- **Pioneering Enterprise Connectivity:** InfiniVAN was among the first to champion dedicated fiber internet with guaranteed speeds and stability, setting a new standard in business connectivity.
- **Powering the PDSCN:** InfiniVAN became a major participant in the PDSCN — the country's most ambitious undersea cable project — linking over 30 key provinces and enabling true island-to-island digital access.
- **Empowering Smart Cities with Innovation:** Bridging the gaps between accessibility, network operations and opportunities of communities and businesses with world-class fiber connectivity that's within reach.

InfiniVAN is thankful to partner and to have clients who share the vision of a better nation. Your trust and collaboration have been instrumental in this journey.

As InfiniVAN looks to the next decade, it remains focused on its mission: to deliver transformative digital experiences through world-class connectivity and ICT innovation — enabling every Filipino business and community to thrive in the digital economy.
