Notice Concerning the Establishment of a Branch in Vietnam by Our Subsidiary

We hereby announce that our subsidiary, ETO Co., Ltd. (Yokohama, Kanagawa, Japan), will establish the Ho Chi Minh Branch in the Socialist Republic of Vietnam through its overseas subsidiary, ETO SOLUTIONS VIETNAM CO., LTD., as described below.

1. Reason for Establishment

In its medium-term management plan, "KBK Plus One 2025," our group has set a key strategy for the machinery parts division to comprehensively support the overseas expansion of our customers, contribute to the creation of business opportunities, and strengthen our global supplier and supply networks, as well as our quality control systems in the vehicle, housing equipment, device, and electronics sectors.

Vietnam, which continues to experience remarkable economic growth, is expected to see sustained market expansion supported by its large young population, the development of its manufacturing industry, and strong domestic demand. In particular, Ho Chi Minh City in the south and its surrounding areas, a major hub for Japanese companies, is home to many of our group's important customers.

With the opening of the Ho Chi Minh Branch, we will further strengthen our sales and technical support systems in the region. By improving services to existing customers and acquiring new ones, we will expand ETO's overseas network and establish a support structure that can respond quickly and accurately to the diverse needs of our customers.

Our group will continue to promote global business development with the aim of further improving customer satisfaction.
