Vision Inc. Partners with ANA X Inc. to Launch "ANA Global eSIM."
- Leveraging "World eSIM®" Infrastructure and Operational Expertise to Expand ANA-Branded Overseas Telecom Services -

Vision Inc. (Headquarters: Shinjuku-ku, Tokyo; President, Representative Director and COO: Kenji Ota) has partnered with ANA X Inc. (Headquarters: Chuo-ku, Tokyo; President and CEO: Shinya Kanda, hereinafter ANA X) to launch "ANA Global eSIM."

"ANA Global eSIM" is an eSIM service provided by combining ANA X's brand and customer base with our overseas telecom infrastructure and operational know-how cultivated through our overseas Wi-Fi router rental service "GLOBAL WiFi®" and overseas eSIM service "World eSIM®."

By utilizing the service and telecom infrastructure of our "World eSIM®" and collaborating with ANA's existing services, we provide a convenient communication environment for ANA customers traveling abroad. Additionally, supporting English and Traditional Chinese, we plan to launch domestic plans in Japan for inbound travelers in the near future.

Through this collaboration, while supporting the provision of "ANA Global eSIM," we will continue to advance collaborations with companies that have member and customer bases, starting with the travel and aviation industries, and promote the expansion of eSIM services tailored to each brand, service, and customer touchpoint.

■ About “ANA Global eSIM”

“ANA Global eSIM” is a service that allows users to use mobile data communication in overseas destinations and within Japan by setting a communication plan on eSIM-compatible smartphones and devices.

There is no need to pick up or swap physical SIM cards, and everything from online application to the start of use can be completed online.

In Japanese, we provide communication plans for travelers heading outbound from Japan, and we plan to launch domestic plans in Japan for inbound travelers—supported in English and Traditional Chinese—in the near future. Furthermore, we have established a seamless framework enabling users to apply for eSIMs by logging into their ANA Mileage Club accounts.

■ Key Features of “ANA Global eSIM”

１． A Wide Range of Data Plans Covering Over 180 Countries and Regions

In addition to single-country data plans tailored to specific travel destinations, multi-country coverage plans are available for regions such as Asia-Oceania, Europe, and North/Central America. Users can flexibly select plans based on their destination, length of stay, and data capacity requirements.

２． Seamless Application via ANA Mileage Club with Miles Earned on Usage

“ANA Global eSIM” allows users to apply smoothly by logging in with their ANA Mileage Club account. Eliminating the need to create or log into a separate, independent account specifically for the eSIM service, we have built an integrated environment that enables effortless access from ANA’s existing services. Furthermore, users earn miles based on their eSIM usage, making international travel even more convenient and rewarding.

３． Upcoming Communication Plans for Inbound Travelers to Japan

In the near future, we also plan to roll out communication plans for use within Japan designed for inbound travelers, supported in English and Traditional Chinese. Moving forward, we will provide a convenient communication environment not only for travelers heading outbound from Japan, but also for international visitors arriving in Japan (*1).

４． Voice Call and SMS Options Available

Along with mobile data, optional plans combining domestic calls, international calls, and SMS are available. Users can customize their connectivity setup—including data, voice calls, and text messaging—to suit their specific destination and travel purpose.

(*1) As of November 10, 2026, this service is exclusively available to residents of five countries and regions: the United States, Hong Kong, Taiwan, Singapore, and Australia.

■ Corporate Collaborations Utilizing Our eSIM Infrastructure

By utilizing the service and telecom infrastructure cultivated through our overseas eSIM service, "World eSIM®," we are advancing the expansion of eSIM services tailored to corporate brands, customer bases, and membership bases.

Going forward, we will expand partnerships with companies that have member and customer bases, including travel agencies and airlines. By embedding eSIM into each company's services and customer touchpoints, we aim to create new added value and provide a more convenient communication environment for both overseas and inbound travelers.
